

Super**FOIL** Insulation

Thermal Insulation for use Under Floors, walls & Other Areas of Construction

Installation Guidelines & Datasheet

SFUF Applications

Basic Install Principles

SFUF

SuperFOIL Insulation

Thermal Insulation for under floors, walls & Other Areas of construction

R
0.8
m².k/w

Key Features

SFUF can be used in floors, walls, roofs and any place that requires a slim high performance insulation

SFUF can be used under screeded & laminate floors as well as over or under suspended floors

SFUF will contribute to the air tightness of your building

SFUF Provides sound insulation & reduces impact noise up to an estimated $\Delta I = 22$ dB

SFUF provides a thermal break to reduce or eliminate cold bridging when turned up the walls

SFUF contains multiple reflective layers that reflect radiant energy into the room

SFUF can be used to meet or improve U-value in both new build and renovation projects

SFUF is ideal for insulating underfloor radiant heating pipes and has grid marking to assist with laying of underfloor pipes

Technical

DESCRIPTION

DESCRIPTION	LAYERS
Polypropylene reinforced heavy outer laminated foil	2
Aluminium coated reflective foil PET layers	4
Thermo foam separation layers	6
Polyethylene protective layer	1
Total layers	13
Packing	142 Poly tube
Weight per roll	9Kg
Dimensions packed	1.5m x 420mm

SPECIFICATION

SPECIFICATION	DATA
Tested 'R' value	0.8
Thickness installed	6mm
Roll dimensions	1.5m x 12.5m
Total area per roll	18.75sqm
Tensile Strength - Lateral	550
Tensile Strength - Longitude	60
Thermal Break	Yes
Acoustic Performance - Noise Impact	Delta L : Up to 22db

Installation

SFUF with Wet Underfloor heating:

- Lay SFUF on a clean, dry and smooth surface
- Start at the wall edge with a minimum of 100mm lapping up the wall edge
- Install your underfloor heating and screeding to the manufacturers recommendations

SFUF Over joists on Suspended Floors:

- Start at the wall edge with a minimum of 100mm lapping up the wall edge.
- Roll SFUF out over the joists
- SFUF can then be stapled in place, onto the joists
- Where rolls meet, butt the edges together and seal with foil tape.
- Decking should then be installed over the SFUF in accordance to the manufacturers guidelines.

SFUF Under Joists on Suspended Floors:

- Roll SFUF out over the joists
- SFUF can then be stapled in place, onto the joists
- Where rolls meet, butt the edges together and seal with foil tape.
- Seal the SFUF around the perimeter or lap it up the wall above the floor deck

Other Applications:

For other applications such as roofs & walls, please call us on 01636 639 900 or visit our site @ www.superfoil.co.uk
