

RUBBERTECH

FIXED HEIGHT PAVER SUPPORTS

FOR TERRACES, BALCONIES, GARDENS & SWIMMING POOL AREAS

MADE FROM RECYCLED MATERIALS

PEDESTALS & SUPPORTS

The Rubbertech range of fixed and height adjustable supports, cradles and pedestal risers provide ideal solutions for the easy levelling of floors, decks and paving slabs in a variety of application situations. Rubbertech products are ideal for both indoor and outdoor use, providing for fast and effective levelling for installations on flat or sloped surfaces.

The products have been tested and proven in all types of applications and can be relied upon for strong and stable installations. From the simplest fixed height paver supports through to fully adjustable and height extendable Pedestal riser systems, whether for low-level installations in applications where threshold heights are a concern, or for high rise support, we have the systems and the answers. A range of accessory items like levelling shims, height extenders, acoustic rubber head and base pads complete the programme.

We offer solutions for fast laying of wood, composite wood, ceramic, marble or granite flooring, and pavers of all types.

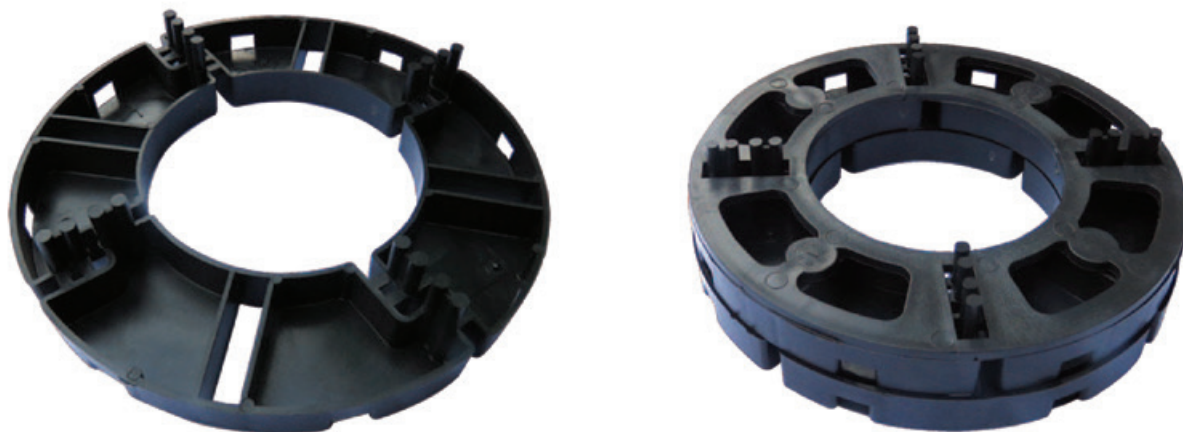

BENEFITS OF PEDESTALS & SUPPORTS

- Fast and very accurate installation
- Suitable for use on waterproofing membranes
- Overall lightness of the actual package
- Elimination of normal slopes at the base
- Natural flow of water
- Improved durability of wood beams.

FIXED HEIGHT PAVER SUPPORTS

FOR PAVER SLABS AND TILES - 14mm

Rubbertech 14mm Fixed Height Paver Supports

Moulded polypropylene Paver Support 14mm high with water channels in base and 14mm x 4mm wide ribs to allow perfect spacing of pavers or tiles. This product is weather-proof and suited for most types of pavers and slabs laid on grit or hard surfaces.

The base of the paver support has a smooth profile which minimises the possibility of damage when used on top of bituminous or other membranes. The base can be easily split into quadrants or halves for perimeters and corners.

Spacer shim ring - 3mm

PS2 under side

3mm thick spacer rings, again easily divided into halves or quadrants, are available to compensate for minor variations in the levels of the laying surface.

The spacers can be stacked for larger adjustments.

The PS2 paver support is also designed to be stackable so, if larger adjustments are required than can be achieved using multiples of the 3mm spacer shim rings, you can simply stack additional 14mm base supports together to achieve 28mm or higher support levels as required.

Recyclable at end of life.

Bulk Box: 360 pieces

FIXED HEIGHT PAVER SUPPORT SPECIFICATIONS

Diameter:	155mm
Height:	14mm (with 14mm high x 2mm wide spacer ribs)
PS2-14	Moulded plastic Paver Support
PS2-14-3	3mm thickness spacer ring
